© Copyright 1970 by the Institute of Physics and The Physical Society and individual contributors. All rights reserved.

Under part 1, Section 7 of the Copyright Act 1956 some libraries are permitted to make single copies of articles for individuals requiring them for the purpose of research or private study. The classes of library accorded this privilege and the conditions under which it is available are set out in the Act and in the associated Board of Trade regulations (Statutory Instruments, 1957, No. 868). Most libraries attached to higher educational establishments and research organizations, whether in the UK or elsewhere, qualify for this privilege provided that they were not established, and are not conducted, for profit. The Act, however, restricts the concession to material not exceeding one article in any one publication and requires that the individual making use of the service must pay at least the cost price of producing the copy.

Except for single copies covered by the concession relating to research and private study no part of this publication may be reproduced, stored in a retrieval system, or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise without permission of the copyright owners.

Published by The Institute of Physics and The Physical Society, 47 Belgrave Square, London SW1, England, in association with the American Institute of Physics.

Journal of Physics C: Solid State will be published 18 times a year in 1971. Details are available on request.

Printed in Great Britain by Page Bros. (Norwich) Ltd. Set in 10/11pt. Times.

The transition to superconductivity of disordered films	
	1575
Low temperature magnetic susceptibility of Kondo alloys	
An anomalous attenuation of the sound near spin-flop transition points.	1587
K. TANI	1597
Far infrared electronic excitations of the Co <sup>2+</sup> ions in antiferromagnetic CoO	
Magnetic interactions in gadolinium orthoferrite	1605
Magnetic interactions in gadolinium orthoterrite	1612
Zeeman splitting of the ground state of Yb <sup>3+</sup> in a distorted cubic-crystal field	1012
J. E. LOWTHER and J. P. KILLINGBECK	1621
DOOK BEVIEWS	1.020
BOOK REVIEWS	1630
N 0	
No. 8 August 1970	
LETTERS TO THE EDITOR	PAGE
An effect of lattice vibrations in the optics of a molecular crystal	
Dispersion of lattice waves in silver	L147
Dispersion of lattice waves in silver S. PAL	L149
Absorption in the vacuum ultraviolet of alkaline earth fluorides containing hydrogen J. H. BEAUMONT, J. V. GEE and W. HAYES	L152
The magnetophonon effect observed in the Hall coefficient	2102
R. A. WOOD, R. A. STRADLING and I. P. MOLODYAN	
Free-carrier Poole-Frenkel effect in crystalline solids . A. K. Jonscher	L159
PAPERS	
Impurity bands in the presence of a magnetic field	
T. LUKES, K. T. S. SOMARATNA and K. THARMALINGAM	1631
Determination of critical behaviour from series expansion lattice statistics IV .	
A. J. GUTTMANN, C. J. THOMPSON and B. W. NINHAM	1641
Low temperature series for the Ising model . C. Domb and A. J. GUTTMANN  The small analysis series for the Ising model . C. Domb and A. J. GUTTMANN	1652
The small-angle scattering of electrons in thin films of evaporated carbon . R. E. BURGE, D. L. MISELL and J. W. SMART	1661
Critical opalescence in binary liquid metal mixtures—II: Concentration depen-	1001
dence P. A. EGELSTAFF and G. D. WIGNALL	1673
The calculation of the elastic shear constants of hexagonal metals using the	
optimized model potential	1677
Dynamics of the rutile structure—II: Lattice dynamics of magnesium fluoride	1602
R. S. KATIYAR	1693
The interaction between two T <sub>1g</sub> (T <sub>2g</sub> ) Jahn-Teller ions	1703
Electron correlation at metallic densities—I: Formalism J. B. PENDRY	1703
Tunnelling measurements on superconducting alloy films in a perpendicular field	
Impurity conduction in synthetic semiconducting diamond	1718
Impurity conduction in synthetic semiconducting diamond	1727
A. W. S. WILLIAMS, E. C. LIGHTOWLERS and A. T. COLLINS	1727

Dispersion of dielectric permittivity due to space-enarge polarization  F. Stern and C. Weaver	1736
The use of nuclear spin-echoes to measure hyperfine field distributions in ferromagnets R. H. DEAN and R. J. URWIN Parametrization of the correlation crystal field	1747
S. S. BISHTON and D. J. NEWMAN	1753
Local vibrational modes of carbon in GaP	1762
Anti-Stokes excited edge emission in cadmium sulphide	1767
The radiation field of the molecular crystal	1780
The vibrational spectra of lithium niobate, barium sodium niobate and barium sodium tantalate	1785
Polarized absorption and fluorescence spectra of crystalline pyrene	1791
The metastable triplet of the M centre in CaF <sub>2</sub>	1797
Accurate force constants from isotopic substitution in the NO <sub>2</sub> radical in NaNO <sub>2</sub>	1807
Recombination luminescence in alkali halides  D. POOLEY and W. A. RUNCIMAN  An explanation of the critical epr linewidth transitions in hexammine nickel	1815
halides	1825
The theory of acoustic paramagnetic resonance of V <sup>3</sup> in MgO C. A. Bates, L. C. Goodfellow and K. W. H. Stevens	1831
Vo. 2 August 1970	
PAPERS	PAGE
Relativistic electron band structure of gold S. Kupratakuln Energy-band structure and Fermi surface of calcium by the orthogonalized plane	S109
wave method S. Chatterjee and D. K. Chakrabort The resistivity of dilute ferromagnetic alloys	
The resistivity and thermopower of liquid mercury and its alloys	S127
Magnetic susceptibility and electrical resistivity of some gold-rare-earth alloys	s S137
Interactions between anomalous local moments: magnetic ordering in rhodium-	I S153
Lattice thermal conductivity of some copper and silver alloys.	s S159
